DETAILED ACTION

Claim Objections

Claims 5-25 and 27 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Claims 5-7, 9-15, 17-22, 24 and 27 are improper multiple dependent claims. Claims 8, 16, 23 and 25 depend upon the above stated improper multiple dependent claims and are objected to as such. Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Busetti et al. (WO 98/32426). Busetti et al. teaches a multiparticulate formulation comprising a

Art Unit: 1615

core of a drug or its pharmaceutically acceptable salt surrounded by a polymeric coating (Col. 2, lines 22-29). The polymeric coating is effective to achieve an initial lag between administration of the formulation and the release of the drug *in vivo* of at least 4-9 hours, but the lag time may be longer or shorter in certain cases (Col. 11, lines 1-10). Busetti et al. teaches that the drug may be a wide variety of drugs but specifically the drug may be a beta-blocker such as bisoprolol fumarate (Col. 6, lines 8-11).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Busetti et al. The teachings of Busetti et al. are discussed above.

Busetti et al. does not specifically teach a lag period of at least three hours but does teach a lag period of 4-9 hours stating that the period may be shorter or longer (Col. 11, lines 1-10). Busetti et al. also does not specifically teach bisoprolol hemifumarate as the drug but does teach bisoprolol fumarate as an acceptable drug for the formulation.

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to adjust the lag time period of the release of the drug *in vivo* either by increasing or decreasing the lag period to achieve the similar results. It also would have been obvious to a person of ordinary skill in the art to use bisoprolol

Application/Control Number: 09/488,103

Art Unit: 1615

hemifumarate as the drug in the formulation being that Busetti et al. taught specifically bisoprolol fumarate but also that the reference taught a wide variety of acceptable drugs for the formulation.

Therefore, the invention as a whole would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M. Joynes whose telephone number is (703) 308-8869. The examiner can normally be reached on Monday through Friday 8:30 -5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on (703) 308-2927. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3592 for regular communications and (703) 305-3592 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
